Odine & Turkcell Recognized at The Fast Mode Awards 2025

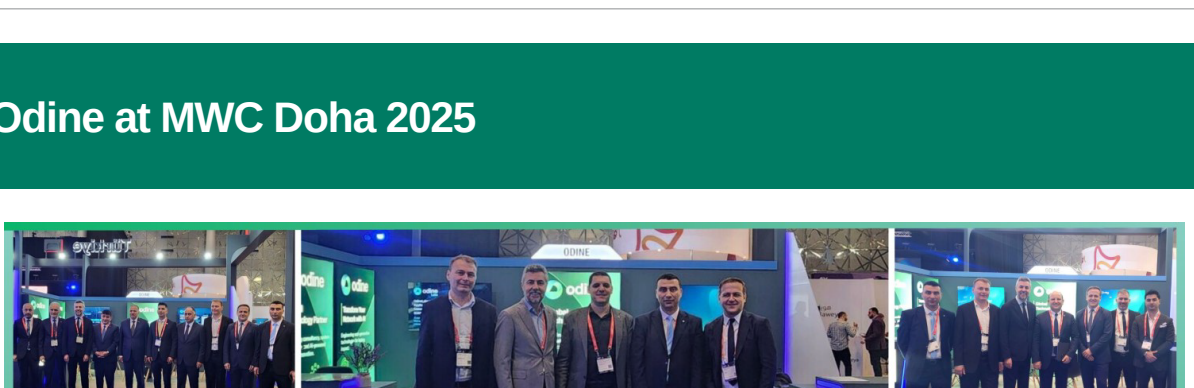

At The Fast Mode Awards 2025, **Odine** and **Turkcell** were recognized with the **Cloud Native Network Leader – Growth Award at The Fast Mode Awards 2025**.

This recognition highlights our consistent focus on advancing next-generation network transformation through cloud-native technologies and delivering measurable impact in real-world deployments. By combining deep technical expertise with scalable, cloud-based solutions, we enable telecom operators to build more flexible, efficient, and future-ready network architectures.

As we continue to support our customers and partners in their transformation journeys, this award reinforces our commitment to creating sustainable value and contributing to the evolution of the global connectivity ecosystem.

Odine at the EU–Türkiye Business Summit: Exploring a Joint Digital Future

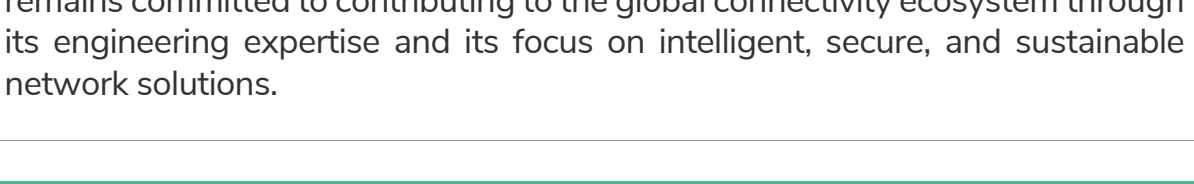

We were honored to have our Chairman & CEO, Alper Tunga Burak take part in the "Bridging Digital Frontiers: Unlocking the Potential for EU and Türkiye's Joint Digital Future" panel at the EU–Türkiye Business Summit, organized in cooperation with the Türkiye–Europe Business Councils and European Business Summits.

Moderated by EU correspondent Jennifer Baker, the session brought together representatives from leading organizations across Europe and Türkiye, including Amadeus (EMEA), TechUK, Trendyol Group, and Türk Telekom.

The discussion highlighted Türkiye's expanding role in digital innovation and its active engagement in the Digital Europe Programme, while also addressing key topics such as the future of artificial intelligence, cybersecurity, digital infrastructure, and smart governance. The panel further emphasized the growing potential for EU–Türkiye co-investment to strengthen digital ecosystems and accelerate the region's digital transformation.

As Odine, we remain committed to contributing to this dialogue through our global engineering expertise and our focus on building intelligent, secure, and future-ready digital networks.

Odine at MWC Doha 2025

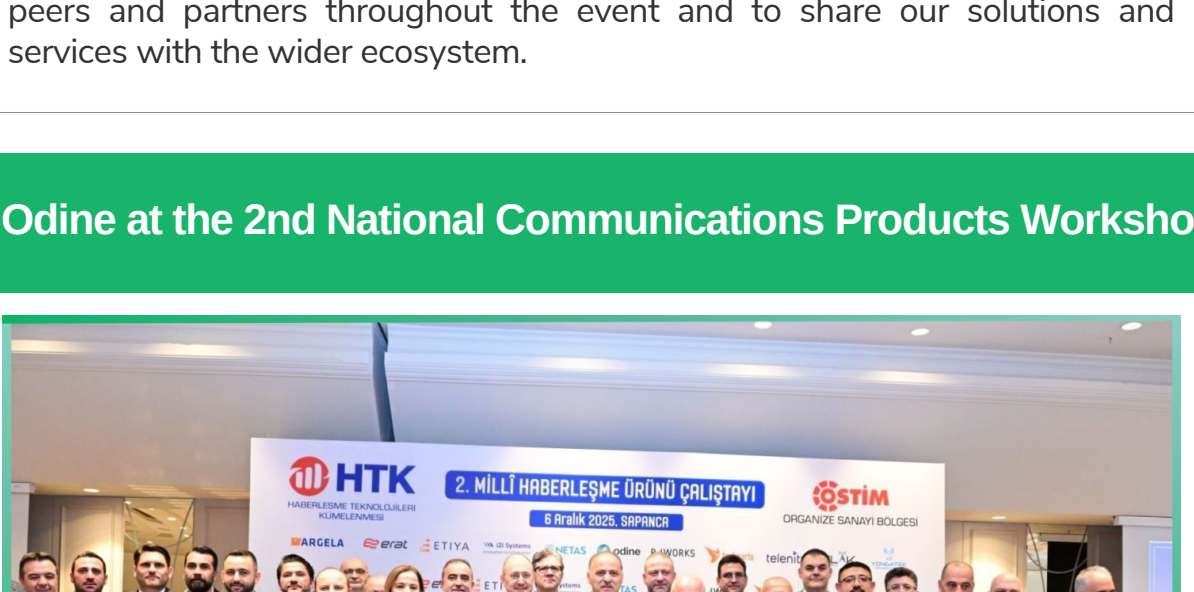

Odine participated in MWC Doha 2025, engaging with industry leaders, partners, and key stakeholders to explore the evolving landscape of telecom networks and digital services.

Throughout the event, discussions focused on AI-enabled, scalable, and cloud-native network architectures, reflecting operators' priorities around resilience, flexibility, and software-defined infrastructures. Key topics included network virtualization, service evolution, and the operational considerations of deploying future-ready digital networks at scale.

Odine connected with senior public sector representatives, telecom executives, and technology leaders from across the regional and international ecosystem, including organizations such as **Turkcell**, **Vodafone Qatar**, **Ooredoo Group**, **du** and **JAWWAL**. These exchanges supported open dialogue on next-generation network strategies, cloud-native adoption, and cross-market collaboration.

First announced at MWC Barcelona, the inaugural MWC Doha event provided a valuable platform for meaningful dialogue and knowledge exchange. Odine remains committed to contributing to the global connectivity ecosystem through its engineering expertise and its focus on intelligent, secure, and sustainable network solutions.

Odine at Red Hat Summit Connect Istanbul 2025

Odine took part in **Red Hat Summit Connect Istanbul 2025**, contributing to discussions on modern telecom infrastructures, operational automation, and container-based transformation.

On the main stage, the session titled "Operational Automation in Modern Telecom Networks: **Vodafone** & **Odine**" featured Serkan Cebi, Head of Turkey Network and EU7 Voice and Data Core Operations at Vodafone, together with Tarkan Alagöz, Vice President of Growth at Odine. The session focused on the impact of operational automation on modern telecom infrastructures and the value it creates for future-ready networks.

Another session, "OpenStack to OpenShift: A Joint Transformation by Türk Telekom, Odine & **iZi Systems**", brought together Serbay Karabulut, Network Virtualization Management Manager at **Türk Telekom**; Ayhan Kapusuz, CEO of iZi Systems; and Bünyamin Öztürk, Services Director at Odine. The speakers shared insights into their organizations' journey toward container-based, modern infrastructure architectures.

Across both sessions, the discussions highlighted the importance of agile, efficient, and scalable architectures in supporting sustainable network transformation.

As Odine, we would like to thank all participants and speakers for their valuable contributions and engagement. We were also pleased to connect with industry peers and partners throughout the event and to share our solutions and services with the wider ecosystem.

Odine at the 2nd National Communications Products Workshop

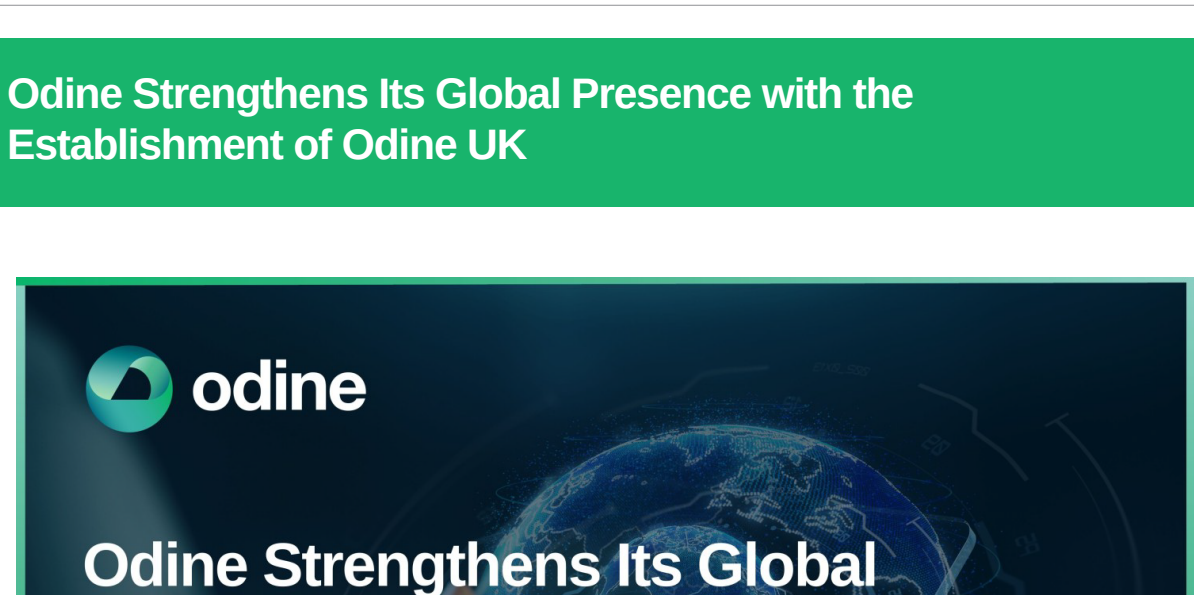

Odine took part in the **2nd National Communications Products Workshop**, organized by the **Communications Technologies Cluster (HTK)**, bringing together key stakeholders from across Türkiye's communications ecosystem.

The workshop was attended by representatives from the Ministry of Transport and Infrastructure, the Information and **Communication Technologies Authority (BTK)**, **TÜBİTAK**, the Ministry of Industry and Technology, as well as senior executives from Türk Telekom, Turkcell, and Vodafone. Discussions focused on strengthening the national communications ecosystem, identifying shared development areas, and advancing inter-institutional collaboration.

As a technology partner supporting Türkiye's communications infrastructure with local engineering expertise, Odine continues to contribute to the growth of the national ecosystem and the sector's collective development.

Advancing Collaboration at Turkcell Supplier Summit 2025

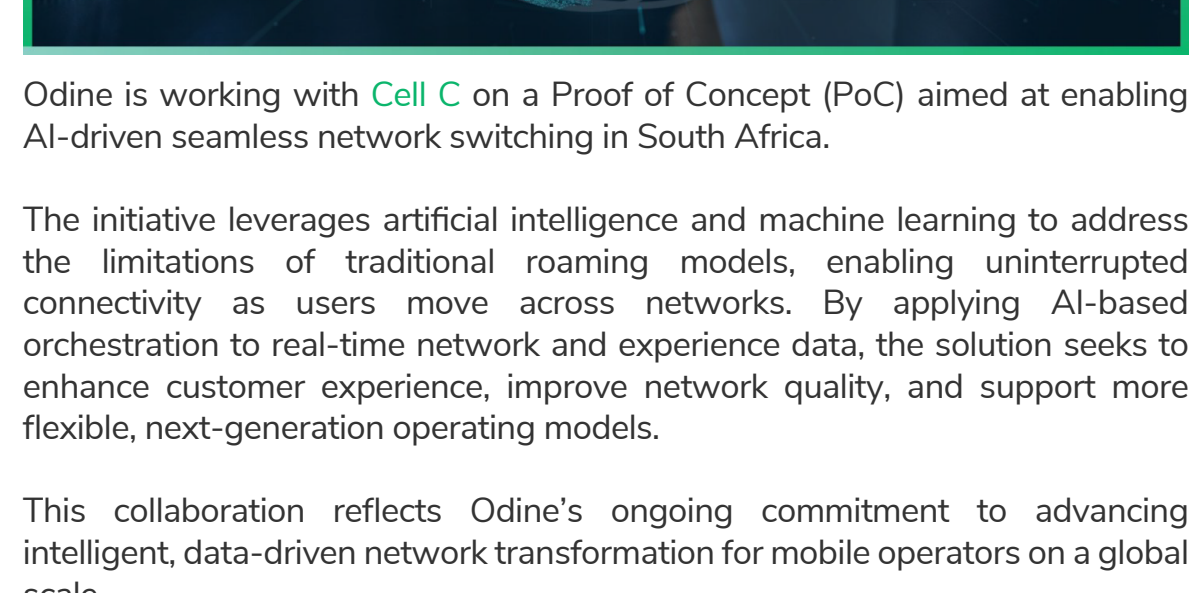

We were pleased to take part in the **Turkcell Supplier Summit 2025**, organized to support local and innovative technologies, together with ecosystem partners committed to creating shared value.

The summit highlighted how strong partnerships translate into tangible outcomes, with discussions focusing on the role of local and national technologies in the transition to 5G, sustainable supply chain approaches, and collaboration models that support ecosystem-wide progress.

As a long-standing partner of Turkcell, we continue to contribute to the local technology ecosystem through our expertise in network transformation, cloudification, and AI-driven automation, and remain committed to advancing this journey together.

A Shared Vision for the Future Red Hat Partner Day 2025

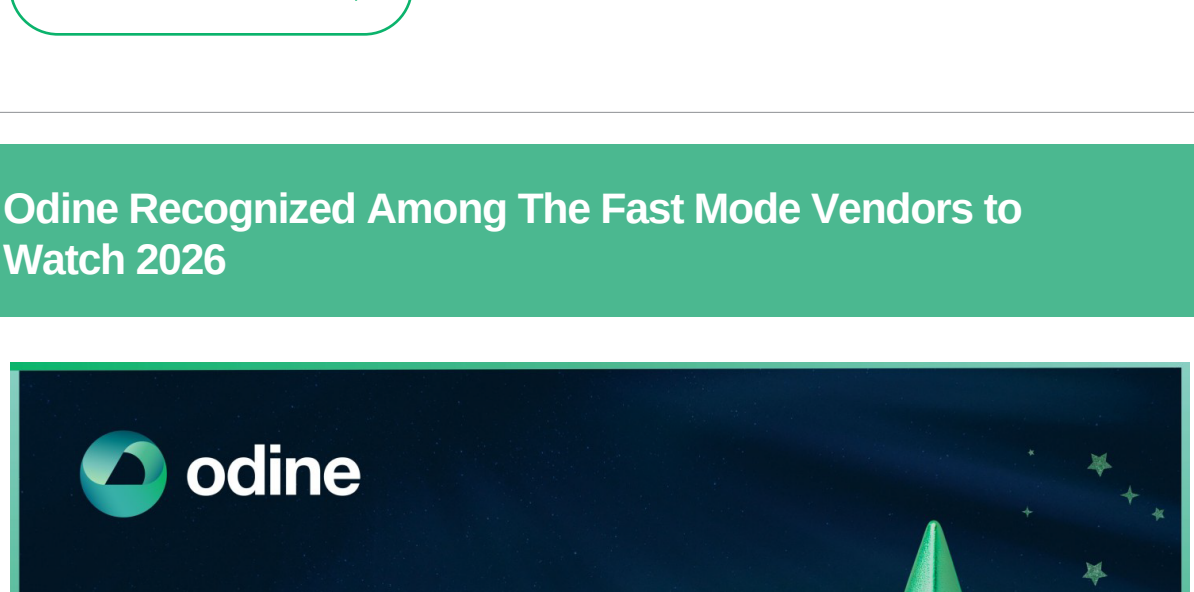

Red Hat Partner Day 2025 brought together professionals from across the industry for a productive exchange focused on the latest trends shaping the technology landscape.

Throughout the event, discussions explored the transformation of modern enterprise architectures, the impact of automation on operational efficiency, and future-oriented collaboration models. This year's program once again highlighted the importance of a strong collaborative culture in supporting sustainable growth.

Working closely with our long-standing partners, we continue to develop solutions that enable organizations to become more flexible, secure, and scalable, while effectively translating technological innovation into tangible value for our customers.

Odine Strengthens Its Global Presence with the Establishment of Odine UK

As part of our global growth strategy, Odine has successfully completed the establishment of **Odine UK**, reinforcing our local presence in strategically important markets and enhancing our regional operational capabilities.

The launch of **Odine UK** represents an important milestone in the company's international expansion journey, enabling closer collaboration with customers and partners in the UK and neighboring markets, while supporting Odine's long-term growth objectives.

AI-Driven Seamless Network Switching: Odine & Cell C Collaboration

Odine is working with **Cell C** on a Proof of Concept (PoC) aimed at enabling AI-driven seamless network switching in South Africa.

The initiative leverages artificial intelligence and machine learning to address the limitations of traditional roaming models, enabling uninterrupted connectivity as users move across networks. By applying AI-based orchestration to real-time network and experience data, the solution seeks to enhance customer experience, improve network quality, and support more flexible, next-generation operating models.

This collaboration reflects Odine's ongoing commitment to advancing intelligent, data-driven network transformation for mobile operators on a global scale.

Sharing Insights on Enterprise Cloud Architectures at TÜBİTAK BİLGEM

On November 27, as part of the Technology Meetups organized by **TÜBİTAK BİLGEM Software Technologies Research Institute (YTE)**, Mesut Aygün, Presales Manager at Odine, shared insights on open-source enterprise cloud architectures and data center transformation during the session titled "Enterprise Cloud Architecture and Data Centers."

The session covered the architecture of OpenStack, its core services, management tools, and use cases in Türkiye, while also addressing the future role of open-source cloud solutions.

Odine Recognized Among The Fast Mode Vendors to Watch 2026

Odine has been featured in **The Fast Mode's Vendors to Watch 2026**, a curated list highlighting technology companies shaping the future of the global telecom and connectivity ecosystem.

This recognition reflects Odine's continued focus on intelligent, cloud-native, and software-driven network transformation, as well as our growing impact across next-generation telecom architectures. Being included among the vendors to watch underscores our commitment to delivering scalable, future-ready solutions for mobile operators worldwide.

Season's Greetings and Happy New Year from Odine!

As we bring 2025 to a close, Odine reflects a year shaped by a strong focus on technology and transformation, driven by collaboration and a continued commitment to shared value creation. Together with our customers, business partners, and all stakeholders who place their trust in us, we have progressed by learning, growing stronger, and scaling our impact.

Aligned with our strategic priorities, we have remained focused on deepening partnerships, strengthening our product and R&D capabilities, and expanding our global reach.

Guided by an approach centered on innovation-driven product development, strategic advisory, systems integration, and managed services, we continue to work closely with our valued partners to deliver trust-based, sustainable, and long-term value.

As we look ahead, we do so with confidence and momentum, inspired by the opportunities that lie ahead.

May the New Year bring you joy, peace, cherished moments, and new opportunities for success.

Happy Holidays and best wishes for the New Year from all of us at Odine.
